

AYUSH NIGAM Aspiring Full Stack Developer

nigamayushnigam3@gmail.com | +91-7268920632 | Gorakhpur, Uttar Pradesh, India | LinkedIn | GitHub

SUMMARY

Full Stack Developer with a strong foundation in Python, Django, React.js, REST APIs, and SQL, with a growing focus on AI/ML and AI-powered applications. Experienced in building practical web solutions and projects that address real-world problems. Eager to contribute to collaborative development teams, learn emerging technologies, and continuously strengthen software development and problem-solving skills.

EDUCATION

Buddha Institute Of Technology, B.Tech- CSE(AIML) — CGPA: 7.5/10 2023 – 2027
Gorakhpur, India

SKILLS

- **Programming Languages** : Python , JavaScript , SQL
- **Frontend** : HTML5, CSS3, Tailwind CSS, React.js
- **Backend** : Django, Django REST Framework (DRF), REST APIs
- **Databases**: MySQL, SQLite
- **AI Tools & Technologies** — Generative AI, LLMs, RAG, LangChain, AI Agents, Embeddings, Vector Databases.
- **Developer Tools** : Git, GitHub, VS Code, Postman, Docker
- **Core Concepts**: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management System (DBMS), Operating Systems, Computer Networks, Software Engineering

PROJECTS

- FitSync**  , *AI-Powered Gym & Fitness Management System* 08/2026
- Developed an AI-powered fitness platform that provides personalized workout and fitness recommendations based on user profiles, goals, and activity data.
 - Built a centralized system for member management, fitness tracking, and intelligent recommendations, helping users follow more personalized fitness plans.
- SkyShield AI**  , *AI-Driven Hyper-Local Early Warning System for Severe Weather Nowcasting(SIH-27)* 08/2026
- Developed an AI-powered system for hyper-local severe weather nowcasting, analyzing weather data from multiple sources to identify potential risks such as heavy rainfall, floods, extreme temperatures, and storms.
 - Implemented real-time weather monitoring, risk analysis, and location-based alerts to provide users with early warnings before severe weather conditions occur.
 - Designed a scalable architecture integrating Python, AI/ML models, weather APIs, and a web-based dashboard for data visualization and emergency alert delivery.
- CrisisAI**  , *AI-Powered Disaster Alert & Rescue Platform* 04/2026
- Developed a web-based emergency response platform  enabling users to report disaster incidents and trigger real-time alerts for events such as floods, fires, and earthquakes.
 - Built a role-based system for users and rescue teams, allowing rescue personnel to monitor incidents and coordinate timely emergency responses.
 - Designed the system with React.js and backend APIs, with scope for integrating AI/ML, sensor data, and intelligent emergency assistance.

ACHIEVEMENTS

Techpile Technology Pvt. Ltd., Lucknow | Python Full Stack Developer Intern 06/2026 – 08/2026
Gained hands-on experience and practical knowledge of HTML, CSS, JavaScript, Python, Django, and SQL through real-world development tasks.

CERTIFICATES

- Artificial Intelligence virtual Internship**  , CodeSoft 03/2026 – 04/2026
- Full Stack Python Developer Training Certificate**  , Techpile pvt. Ltd 06/2026 – 08/2026
- Python Programming Internship Certificate**  , CodeAlpha 01/2026 – 02/2026
- TCS iON Career Edge - Young Professional program**  , Business Etiquette, Presentation Skills, and Effective Email Writing
